

I'm not robot!

Google assistant for windows 8.1. Google assistant for windows 8.1 download. How to get google assistant on windows.

Install the Unofficial Google Assistant for Windows and set it up as a project in the Google Actions Console. Then, use the keyboard shortcut Windows key+Shift+A to open Google Assistant. On a Chromebook, go to Settings > Search and Assistant > Google Assistant. There is no official Google Assistant app for Windows, but there is a workaround to access Google Assistant on a Windows 10 computer. You can also enable Google Assistant on Chromebooks. To get started using Google Assistant on Windows, install the Google Assistant Unofficial desktop client and then set it up. Go to the Google Actions Console and select New Project. Agree to the terms and services. Enter any name for the project (such as WindowsAssistant), then select Create project. Scroll to the bottom of the next page and select Click here next to Are you looking for device registration. Select Register Model. Enter any names you want in the Product name and Manufacturer name fields, choose any device under Device type, then select Register Model. Select Download OAuth 2.0 credentials to download the JSON file you need to set up the assistant. Close window by selecting X. Go to the Google Cloud Platform and click Select a Project at the top of the page. If your project name appears next to Google Cloud Platform, skip to step 11. Select the All tab, choose your project, then select Open. Select APIs and Services in the left menu (if you don't see it, select the menu icon in the upper-left corner). Select Enable APIs and Services. Enter Google Assistant in the search bar, then select Google Assistant API. Select Enable. On the next page, select Credentials in the left sidebar, then select Configure Consent Screen. Select External for the User Type, then select Create. Select User support email and choose your email address. Scroll to the bottom of the page, enter your email address under Developer Contact Information, then select Save and Continue. Skip the next two pages (Scopes and Optional Information) by scrolling to the bottom of the page and selecting Save and Continue. Scroll to the bottom of the page and select Back to Dashboard. Scroll down to the Test users section and select Add User. Enter your email address and select Save. Go to the Google Assistant Unofficial desktop client download page and select the Google Assistant-Setup-1.0.0.exe file to download it. Open the Google Assistant-Setup-1.0.0.exe file you downloaded and follow the installation instructions. Choose Anyone who uses this computer (all users) to enable the assistant for anyone who uses the computer, or Only for me (user) to enable it for your personal Windows account. If the assistant doesn't appear right away, press Windows key+Shift+A to bring it up, and then select Get Started. Use the keyboard shortcut Windows key+Shift+A to open the Google Assistant Unofficial desktop client anytime the program is running. Select Proceed. Select the Settings gear. Next to Key File Path, select Browse and choose the JSON file you downloaded in step 6. Select Save, then select Automatically set a path. Select Relaunch Assistant. A new browser tab opens for you to get the required security token. Choose your Google account, then select Continue. Select Continue again. Select the Copy icon to copy the token link. Paste the link in the Google Assistant app and select Submit. Select Relaunch Assistant again. The unofficial Google Assistant app is ready to use. Type a question, or select the microphone icon to give a voice command. If you have a Chromebook or Chrome OS device, you can enable Google Assistant. Go to Settings. Scroll down to Search and Assistant and select Google Assistant. Make sure the slider is set to On. Enable the OK Google setting to allow the system to listen for and respond to that voice command. (Adjust any other options, as desired.) If your goal is easy access to Google Assistant, the simplest approach is to purchase a Google Home device and set it up next to your computer. You can also install the Google Assistant app (for Android or iOS) on a phone or tablet. For a more do-it-yourself experience, buy and build the Google Voice Kit. FAQ How do I turn off Google Assistant on an Android? To turn off Google Assistant on an Android, go to Settings > Google > Account Services > Search, Assistant & Voice. Tap Google Assistant and go to the Assistant tab > turn off Google Assistant. How do I use Google Assistant on an iPhone? To use Google Assistant on an iPhone, download and install the iOS Google Assistant app from the App Store. Go to the Shortcuts app and tap the plus sign (+) > Add Action. Search for and select Assistant, tap Hey Google, and turn on Show When Run. Enter Hey Google as your shortcut's name. Now you can open the Google Assistant app with the phrase, "Hey Google." How do I turn off Google Assistant on a Chromebook? On your Chromebook screen, select the time and then select Settings. From the menu on the left, select Search and Assistant and choose Google Assistant. Turn off Google Assistant from here. Thanks for letting us know! Tell us why! At the moment, Google Assistant is not available for download on computer. However, you can use emulators to run Android applications on PC. One example is the BlueStacks App Player. It is a powerful tool that provides users a virtual device similar to an actual phone. This also enables users to install games and other popular and in-demand applications. Thus, you will be able to access the Play Store without any restrictions. The downside of this is it slows down the performance of your computer even though the app is not running in the background. Not only that, some complains about its sluggish operation. Let us proceed with the steps, so we can use Google Assistant on your computer in 4 simple steps below: 1. Download and install the BlueStacks App Player on your computer - Here >> . If you successfully downloaded the Bluestacks.exe, go to your Downloads folder on your computer or anywhere you usually store downloaded files. Once you have find it, click it to install the application. It should start the installation process on your PC. Click Next to accept the EULA License agreement. Follow the on screen directives in order to install the application. If you do the above correctly, the software will be successfully installed. 2. Once it has been installed, open the program and sign in using your Gmail account or create a new one. 3. Search for Google Assistant on the Play Store and install it. Now you will see the "All Apps" button. Clicking it will take you to a page containing all your installed apps. Google Assistant 4. Run the app and enjoy your favorite Utilities app on Windows PC.
