Ladies and gentlemen, boys and girls, thank you in advance! I've wanted to be an artist all my life and I've watched myself do it for years, being like other pokets like them. I decided to pursue it. I'm exploring different communities to connect with more people and share my content because I truly believe I have something for other people. I hope you decide to take a look at my content and stay with me. I'm an extremely energetic, avid gamer, and Pokémon was one of my first games. I started with the red Gameboy Black and the white version. However, I am sharing my best project of all time, Soul Silver, at random. I think you'll like Nuzlocke with a fixed curve. The specific rules and details of the Randomizer can be found in the video: Standard Nuzlocke Rules: 1. If a Pokémon faints, it is dead and cannot be used any further. 2. You can capture your first encounter on each route. 3. You must name each Pokémon to strengthen the handcuffs. Lockout Rules: The rules of the game begin to restrict us more, as with each token of our gym we open something like a castle. Castle unlocking costs as follows: First icon - allow use of items to improve second icon - allow evolution third slot - give your pile 4 Pokémon fourth drawer - allow fifth drawer - allow 5 Pokémon into your pile. 6 Pokémon in the eighth icon - Revived the details of the randomness of Dead Pokémon: TMS, Elements, Wild Pokémon, the ability of the Pokémon trainer is completely randomized. It has competitors throughout the game. Level up is 10%. Trade evolution is prohibited and fully developed at 45 Pokémon levels. I hope you appreciate my work and join me. Thanks in advance to the team! Part 2 - This challenge is hard to read! Everything in the title says that in this chapter we move on to the Tower of Filiz and I begin to explore the other difficulties that this Uncke Varyan will bring me. We get some new matches and decide who to add to the team. Ladies and gentlemen, boys and girls, thank you in advance for taking a while with me! Throughout my life, I wanted to be an artist and for years I watched other Poketuber doing what I like, wanting to resemble them. I also decided to do it. I studied different communities to communicate with more people and share my content because I really believe I have something for others. I hope you decide to browse my content and stay with me. I'm a very energetic and enthusiastic player, and Pokémon was one of my first games. I started with the Gameboy red black and white version. But here I share my all-time best project Soul Silver Randomized Unlocks. It's a heavy corner nuzlocke, I think you'll love it. Special rules and randomization information can be found under the video: Standard Nuzlocke Rules: 1. If Pokémon faint, it dies and becomes unusable. 2. Only the first match can be made on each route. 3. Each Pokémon must be named by a nickname to strengthen the link. Unlocking Rules: The above rules of the game also limit us even more when we unlock something with every gym emblem. The locks are as follows: the first token - allow healing objects in the second badge - Allow the development of the third badge - allow 4 pokemons at their party to the fourth badge - allow TM to use the fifth badge - allow 5 pokemons to your group sixth badge - allow the stored items to give seventh badge. - Allow 6 pokemons to your group Eighth badge - revive pre-dead pokemon. The details of randomization are quite standard: TM, objects, wild pokemons, coaching pokemon abilities are completely accidental. The opponent keeps his start throughout the game. The level increases by 10%. The trade evolution was disabled and a fully developed Pokémon had to reach the 45th level. I hope you enjoy my job and join my trip. Thank you to the team before! Part 2 - This challenge is difficult! As the title points out, in this episode, we enter Sprout Tower, and I started to find out what additional challenges to me will be for this Unlocks option.
