TalkBack is an accessibility feature that helps people who are blind or have low vision to interact with their Android devices using touch and spoken feedback. When TalkBack is on, items on the screen are outlined with a focus box, and the device gives audio cues about what is on the screen. Instead of typical touch interactions, you can navigate the device through TalkBack gestures. To learn TalkBack basics, watch a video. Camera Switches | How to turn off TalkBack screen reader A few Talkback gestures to remember: To scroll up or down on the screen: Place 2 fingers on the screen and drag up or down. To move the focus box from one item to another: Swipe left or right with one finger. To select an item: Touch the item with one finger, then double-tap anywhere on the screen with one finger. Tip: To turn off TalkBack, depending on your device and settings, you might need to try more than one of the options listed below. Option 1: Turn off TalkBack with shortcuts Important: The Talkback shortcut setup varies depending on the device manufacturer, Android version, and TalkBack version. Try the following options to turn off TalkBack: Press and hold both volume keys for a few seconds. Listen for confirmation that TalkBack is turned off. If you have any other shortcut button or a floating button displayed on the screen, set the focus on that item by touching it with one finger, then double-tap to turn off TalkBack. If these options don't work, try one of the other options below. Option 2: Turn off TalkBack with Google Assistant Say "Hey Google, turn off TalkBack." Listen for confirmation that TalkBack is turned off. Option 3: Turn off TalkBack in Settings Step 1: Unlock your device If your lock screen doesn't show, press the Power button. If the lock screen still doesn't show, turn on the screen display with TalkBack gestures: With one finger: Swipe up and then right (or swipe down and then right) to open the TalkBack menu. In the TalkBack menu: Tap Show screen once to focus it and then double-tap to select it. From the lock screen, bring up the password screen, swipe up with 2 fingers from the bottom. On the password screen, use your PIN or pattern to unlock the phone: To Unlock with your PIN: With one finger, tap on each number of your PIN and then tap OK or the enter button. To Unlock with your Pattern: With one finger, tap on each dot of your pattern one after another continuously. Once the phone is unlocked, try to turn off TalkBack using shortcuts, press volume up and down keys together for a few seconds, or ask the Google Assistant to turn off TalkBack. If these shortcuts don't work, proceed to Step 2. Step 2: Open your device Settings There are 2 ways to open your device settings with TalkBack.
