With Denis Villeneuve's direction and Emily Blunt's performance adding gravitas, the film scratches that same underworld itch as John Wick. Meanwhile, Sylvester Stallone returns in The Expendables style for raw survival and retribution, while Kraven leans into primal vengeance, family betrayal, and animalistic violence - a superhero-tinted take on John Wick's fury with blood-soaked action sequences. Tom Hardy brings his A-game as Eddie Brock/Venom in the final installment, blending violent anti-heroics with a bromance between man and symbiote that's messy, chaotic, and aggressive. Other outliers offer unique narratives that might catch you off guard: Ad Astra delivers intense WWII tank warfare with Brad Pitt; 6 Underground is a tense military thriller starring Liam Hemsworth and Russell Crowe; and The Game Changers takes an unconventional approach to the mindset of men chasing physical dominance in America's steroid obsession - a documentary that offers interesting context for characters like John Wick.
