AirDroid Desktop is an Android Application that allows you to manage phone files, text messages and incoming calls from any computer. It is also possible to control the device remotely using the service and everything that is originally needed for this is a web browser, but this is the free and downloadable desktop version and it works just as well as browser version.cable-free connection à . You Donate T Need a USB cable to connect the Android device to your computer to transfer your files. You could have lost or damaged the cable and you have problems at this time, and thatÀ è s still well. AirDroid Desktop allows you to access your Android and even your Apple devices using the Internet. It is largely similar to how ARDROP works from Apple: a wireless connection is formed between the device and you can freely check your other device on the PC. You can make file transfers, get text messages and respond to their computer, move game applications and game on your PC, instead, and even remote control your phone camera s to see whatÀ è is happening around now. The device doesnÀ è t even need to be nearby, as with bluetooth è you can still check your Android device, even if youÀ è king miles away. Unfortunately, this means that AirDroid is very based on the internet for work, and if you give t they have any connection, you could also return to using a cable or Bluetooth. All for Onethe best of AirDroid, compared to its rivals, It is that it is compatible with different platforms, even when they have different operating systems from Android. AIRDROID is free up to a certain point, but still does to skim than you and will allow you to have the convenience to transfer files or sms into wireless mode without touching the phone. The freedom of cross-platform services can always be heard when you have different brands devices. You could own a PC and one of the Microsoft Apple and AirDroid tablet it is still possible to help the synchronization of the two so you can transfer the photos between them. However, problems with this extensive access once again come from web connection requirements. Compared to synchronizing a Mac laptop and an iPhone via AirDrop, AirDroid can turn more slow if you synchronize one of the two with another different device in OS. ThereÀ è s Even the always risk of contracting viruses from the internet.ThereÀ è s always a priceairdroid and its desktop client offer greater productivity, even if you don taking the phone or tablet. EA è s is easy to use and highly convenient if youÀ è king in a pinch. AirDroidÀ è s Premium offer only improves the use of the apps and adds more attractive incentives of its free offer already generous. Unfortunately, WONÀ è t is always safe since it uses the Internet as your path for your devices, and you should always have the antivirus programs ready, right in Case.airroid allows you to access and manage your Android phone or tablet from Windows , Mac or the Web, in wireless mode, free of charge. Transfer files between devices and share files to your concentrated friends.better: calls, text messages and app notifications allowed you, mirror for the large computer screen that are concentrating on.Better equipped: type with full physical keyboard and control with a mouse. Download AirDroid, an application that will give you access to your Android smartphone or tablet directly from your computer using wireless wireless The application is designed to help you give smooth and quick access to your phone or to your tablet using a wireless connection. Furthermore, it is able to easily transfer the files between the computer and the device, as well as performing other actions. File transfers have made it easy for primary tasks that many people do when connecting phones to their computers transfer files from one device to another. You will also transfer files from your phone to your computer and vice versa using this application. Includes all types of files, including songs, audio, video, photos and others. Transfers are carried out quickly and will also depend on the strength of your wireless connection. Biggest is the file, longer it may be necessary to complete transfers, though. If you want to have an even easier way to manage your files, you can download the sister app for Android devices and connect the two from there. Performing other taskairides is useful even when you want to manage other activities on the phone. Includes reading your messages and remotely check your device, including responding to text messages from other people. You will also be able to view the call list on your device, giving you a good way to fully check your phone. This is also a feature called E2EE, or end to final encryption, which establishes rapid and reliable connections that are encrypted. You can transfer or manage files, photos, documents, music or remote APK files. You can also receive notifications directly on the desktop for SMS, e-mail, app notifications (such as whatsapp, facebook, etc.). It means that your connection cannot be hijacked by someone else, which is nice to know if you want to transfer your files as safe as possible without risking your rulen.conclusive data, you want to control the phone remotely using a wireless connection, airdroid It's an excellent option. It is easy to use and allows rapid and reliable connections. Connections.
