The application

only pays £5.5 to add your loyalty cards directly to your attractive information. You must be 16 years or older. Your account must be at least £10.10 and an active debit card (blocked or banned). € Fingerprint and face recognition feature found on select devices. 18 year old UK customers and provided by Transunion. It can only be used for personal and main checking accounts. Each country should be registered separately. The itinerary is for debit cards only managed by a mobile bank and only added to the accounts listed after your name. Joint account holders should be recorded separately. Make sure you have to let the app find your position. In order to "pay your contacts", apps need access to your contacts/list of mobile devices. We recommend that you save or print a copy of the terms and conditions of personal data protection for your archives. In 2023 on February 15, version 7.27.0. € Now you can pay anyone using a secure link. No bank data is required. No problem. á € Now you can reduce the limit of contactless transactions on the delicate card. á € Now you can re-order your favorite payment provider, individually adapted to you. Access payments center will be launched. I like everything, but a few things could be improved. I like to be informed about transactions. I can add additional bank accounts instead of connecting separately to see sales. I can add loyalty cards and set up savings goals. It's a really good app and a good bank. I have been in RB for a long time. Their customer service is very good (except for the guy who was extremely difficult, unsympathetic and just rude to the extent that he forced me to hang and hang up ... then I complained to him when I remembered) never had any more Problems with them since the late 1990s. They are always helpful (except this type) and really try to solve any problems you have. Things that could be improved. I would like to be able to remove the recipient. You know, this old friend who doesn't look like you anymore, just in case I accidentally influence it because I don't earn money lol. Second, if I want to see past transactions. I think the beach options for a date are very confusing. This should allow me to select the start and end date. It seems to be, but it is not. It's not as simple as it should be. I think the name or company would be a good choice. As a result, I don't have to go through the transactions' pages to find what I'm looking for. Overall, the program is good. Definitely a large improvement compared to previous interaction. But some quite serious songs. 1) Face ID for concerns about payment. Just look at the photo he recognizes and compare her with all his poses. And what is it all. I can unlock the phone with my face in the dark, but I can only send the payment when I blink like when I get a fly on my lid! Please repair! 2) Backs and wages. Why can a challenge bank like Monzo tell me when the money was stored from the basket? Do housework. Not only will you receive a message of about 3 days and you will get it at 16:00. Per day until RBS provides you with funds. I thought that the payments of the basket had been informed of the bank, taking the advice if fate? 3) also with direct load. The same claim of the banks 3 days before the amount and the payment date when the payment order is called. To verify the amount and b) make sure you have the funds to cover or cancel them if they do not save, the withdrawal commissions (inspection banks charge direct fees without success!) To implement them 3 changes to adapt to competitors and you will be easy to get 5 stars from me. Thanks for the exam ð. I'm sorry there have been problems with this, we really want to reach your mind. I invite you to send a message via Facebook or Twitter with your name, the system code and the postcode and we can help you solve it! -Ad I used this program from its exit and it is very useful and over time it has further improved the program, but the last update 6.6.0 is a big opposite step because my sales are wrong! I do two accounts in the accounts and one of the total costs, the invoices are connected, so if the balance of the total cost account drops below - 50 pounds are integrated by the second account, the sales were displayed correctly before the update, Now it's just spoving. For example, if I had £ 250 in my main account and I say "75 pounds at my second account, it is displayed in this way, I just have to use waiting operations, now the accounts show that the account is the main poster" 250 the "£ 250" pounds £ 250 and the other account shows £ 325, added the balance of the basic account to the second account, which you think you have more money than you actually. There is no doubt that the accounts are connected and that the program is not correctly made, has called many people from RBS and cannot solve it. So, programmers women you can order an application again and stop showing money that I don't have !! The Natwest Group Plc developer said that the practice of privacy in programs may include data support as described below. For more information, read the programmer's privacy information. These data can be used to follow you with programs and websites belonging to other companies: these data can be collected and connected to your identity: coordinates of leasing of financial information.
