This is not only an OS but also a computer component that handles cloud computing functions. This edition for Windows 8 comes in three modes standard, data, and essentials. The standard is most appropriate for companies that handle most of the functions remotely. The data center is good for high-level environments and essentials are appropriate for up to a maximum of twenty-five users.This version is after Windows Server 2008. 2012 handles the IP systems and control panel management systems. The installation is simple and straightforward for you only need to follow the wizard-like installation to deal with all the functions. Those error notifications you get when you just do the wrong thing on a computer then you are sure that this is the power of this. During installation, it comes with two options which include server core and server with the graphical user interface.If you are a businessman and looking for an operating system that has minimal complications with most of the business applications then this is the tool for you.
